

Bierce Creek Drainage

General location

General characteristics

7th field huc id = = 171 0020601 0608

Parent watershed = UPPER SIUSLAW RIVER

Total acreage = 6232

Maximum elevation = 499 feet

Minimum elevation = 127 feet

Ecological Capital

17 percent of the catchment has potential to contribute lwd to the aquatic system

51 percent of the stream system has adequate shading

40 percent of the riparian area is in good condition

8 miles of stream have inherently good coho spawning and rearing habitat

98 acres of potential or existing wetlands are present within the catchment

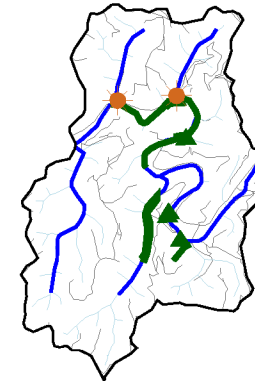

Potential Threats

There are 88 points where roads cross over fish bearing streams

Riparian road density = 1.06 miles per square mile

Mid-slope road density = 1.40 miles per square mile

7 percent of the catchment is considered to have a high potential of land slide occurrence

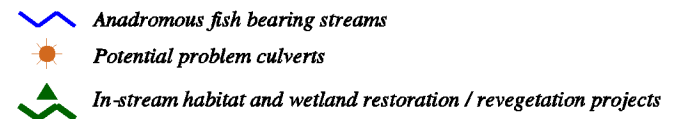

Ownership Patterns

1 percent of the catchment is private non-industrial

42 percent of the catchment is private industrial

55 percent of the catchment is federally owned

1 percent of the catchment falls on other public lands

Notes

The catchment is dominated by low or moderate gradient unconfined streams, floodplain or estuarine channel habitat types. A total of 12.83 miles of stream are considered anadromous fish bearing and 4.15 miles of stream have digitized habitat surveys. A total of 4.34 miles of spawning surveys have been conducted since 1990 reflecting relatively moderate numbers of coho spawners. No snorkel surveys have been conducted in this catchment.

There is most likely sufficient lwd production and input into the aquatic system. The location of lwd sources should be identified and efforts should be made to maintain production.

Stream temperatures may be high due to the high percent of streams exposed to direct sunlight. Streamside shading is most likely limiting water quality for fish habitat.

Because of high fish productivity and moderate amounts of ecological capital this catchment has some potential for consideration of anchor habitat status
